Soft skill training during - UG Orientation Day 2018- 1ST MBBS 2018-19 Batch held on 29th August 2018 at RMC Auditorium

2. Language and communication skill development- Year wise report

2015

Kannada classes for Physiotherapy students was initiated 2014. A large majority of patients in the teaching hospital use Kannada as a language of communication. It is a common experience that patient doctor interaction in the local language builds up a better rapport. Hence, there was a felt need to expose and train non Kannadiga students in the local language-Kannada as the students admitted to the professional course come from different linguistic background.

In the first year, emphasis is laid on preparing the students for general and day to day communication with Kannada speaking local population and an orientation to patient doctor communication. In the second and subsequent phases, the focus is on patient doctor interactions with special reference to history taking, examination and interaction with relatives of the patients.

Program is conducted for BPT students during their first year. About 40 BPT students attended the program for the academic year 2015-16.

The delivery of content was interactive and student centred. The learning outcomes are measured by using written and oral assessments.
