

Internal Quality Assurance Cell (IQAC)

Minutes of Meeting

5th Sept 2020

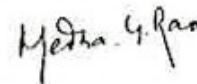

Dr. D. Venkatesh welcomed the members to the meeting.

The committee was informed that the collation of information is nearing completion and final preparations are underway to submit application and self study report for NAAC accreditation. Committee appreciated the efforts of different criterion committees in collecting and organizing the necessary information leading to NAAC accreditation.

The committee members expressed happiness about the online teaching-learning activity catering to the needs of student during the testing times. They also appreciated the innovative methods used in conducting both theory and practical components of formative assessments successfully. However, they expressed their reservations about the relatively small number of dedicated e-content developed by the faculty members for the institutional database. Members urged the administration to fix specific target to be achieved by the faculty members.

The committee suggested obtaining feedback about altered methods of curriculum delivery and problems experienced by the students during such learning session. The information can become handy in preparing and delivering e-content as blended learning is likely to become the order of the day in future.

Further, the committee members suggested that growth is hallmark of any quality process. It is desirable to identify the strength of the staff, encourage pursuing their interest in the fields of teaching-learning, research and service.
