GEF shall be the deciding authority for managing resource mobilization.

The goal would be to promote and nurture quality care, academics and research activities by framing strategies for productive and proficient utilization of resources, based on fiscal judiciousness.

Objectives:

1. To diversify the avenues for education, in addition to the tuition fees which forms the core component, additional revenue can be bolstered using the concept of "study" based abroad" advocating student exchange programs with Universities abroad.

2. *Patronising endowment funds and mobilising corpus fund to support/recognise meritorious candidates.*
3. *Improving the IT framework to support digitalization of teaching learning methodologies*
4. *Ensuring adequate facility for quality care of patients by providing high end equipments both diagnostic and interventional, prioritizing in a time bound manner*
5. *Promoting extra mural funded research activities, community health programs and Industry academia collaborations to bring in more resources.*

The annual budget shall be presented to the GEF Trust. This will be reviewed by the CFO. Vendors shall be identified and presented to the Institutional purchase committee. The Committee in turn will discuss the utility of the proposed expense for further consideration . A centralized system of supply is operational where in all purchase indents shall reach the purchase Department and after procuring the items, an indent is placed online to the stores for disbursement of the same. With regards to capital expenses, need based allotment of budget shall be facilitated.
